

Page

```
classDiagram
    class Page
    class WebFormAccountRegister["WebForm.Account.Register"]
    WebFormAccountRegister --|> Page
```

A UML class diagram illustrating inheritance. At the top is a box labeled "Page". Below it is a box labeled "WebForm.Account.Register". A blue arrow points from the "WebForm.Account.Register" box up to the "Page" box, indicating that "WebForm.Account.Register" inherits from "Page".

WebForm.Account.Register
